

THE AREA OF THE GAMAY WINES

Renaïson has 4 wineproducers good for more than 2000 hectoliters of wine with the label AOC Côte Roannaise.

The red wine and the rosé are produced from the gamay grape.

The wines are fruity, light, and with a smooth finish. You can keep them up to 5 years.

Lets get surprised and come over to taste bij the local vigneron.

YOUR VISIT TO RENAISON

Edition 2026

- A VERY BEAUTIFUL NATURE
- THE AREA WITH GOOD WINES AND THE GASTRONOMIC FRENCH KITCHEN
- THE TALLEST TREE IN FRENCH
- AND MUCH MORE...

The dams Chartrain (La Tâche) and Rouchain are built side by side. It is a pleasure to walk there.

The first, built in 1888 - 1891, is a stone-built dam beautifully situated in green forest. It is a so-called "arch dam" and one of the oldest arch dams in France.

The second dam was commissioned in 1976, and this is a so-called "riprap dam", a heavy dam built from stone chunks.

The two reservoirs provide the city of Roanne and the wider area with wonderfully soft water, which is unique in France.

In the shady park around the reservoirs you can also enjoy a kindergarten, and you can visit the building of the water authority.

The biggest of Europe are in Renaison : On the banks of the Chartrain reservoir you will find the tallest tree in France and the tallest Douglas in Europe, about 67m. Route towards Saint Rirand.

Les Grands Murcins :

At 800 m altitude, 15 min from Renaison, you will find the Grand Murcins park, with a great view of the valley of Roanne.

The 120 ha forest consists of many different types of trees from all corners of the world, a botanical forest, hiking trails, and you can picnic there. There is a chalet where you will find information about the origin and maintenance of the forest.
